PROFESSIONAL SUMMARY

Computer Engineering undergraduate (CGPA 9.51) currently working as a full-stack development intern, with 7+ live, shipped full-stack projects demonstrating end-to-end ownership – RESTful API design, MongoDB schema architecture, and responsive React.js frontends. Strong foundation in DSA, DBMS, and OS.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Framer Motion, Three.js

Backend / Tools: Node.js, Express.js, RESTful APIs, JWT Auth, Git, GitHub, Vercel, Render, Docker

Databases: MongoDB, Mongoose, PostgreSQL, SQL, Schema Design

AI / Agentic Systems: Agentic Tool Calling, RAG, Model Context Protocol (MCP), Groq (Llama 3.3 70B), Gemini API

CS Fundamentals: Data Structures, Algorithms, DBMS, Operating Systems, OOP

WORK EXPERIENCE

MERN Stack Development Intern – Cpiombo Servtec Pvt. Ltd.

June 2026 – Present

Hybrid, Mumbai

- Independently work on full-stack development of a B2B Site Operations SaaS platform end-to-end – backend architecture, database design, frontend implementation, and testing – as the sole engineer across 4+ core modules.
- Architected and shipped a complete 6 stage Supplier Onboarding system single-handedly, replacing a static UI with a live, database-driven pipeline.
- Built a full Procurement lifecycle spanning sourcing, supplier acknowledgment, purchase order dispatch, goods receipt, and automated reorder generation, with partial-order fulfilment and alternate-supplier logic across 6+ interconnected workflows.
- Designed a concurrency-safe, mutex-protected ID generation system powering every business document on the platform (purchase orders, invoices, tasks), eliminating ID collisions under concurrent multi-user load.
- Diagnosed and resolved multiple critical data-scoping bugs across the existing platform, migrating core query logic to a more reliable approach across 35+ components and eliminating silently dropped multi-batch records.

Member, National Level Committee – Computer Society of India (CSI)

2025 – 2026

- Independently sourced and closed a Rs. 10,000 sponsorship deal with a study-abroad consultancy for the committee, demonstrating initiative and stakeholder engagement.
- Co-organized 3+ national-scale tech events, coordinating logistics, speaker outreach, and community engagement across member institutions.

PROJECTS

Artello – Real-Time Collaborative Canvas [Live ↗](#)

- Built a real-time multiplayer drawing website with Socket.IO, redesigning the canvas to use two separate layers so only the active stroke redraws instead of the entire drawing history — keeping it smooth even as boards grow large.
- Cut network traffic by ~80% by sending fewer draw points per stroke, and added automatic history flattening (converting old strokes into a single image) so boards load fast even on free-tier hosting.
- Lighthouse scores — Performance: 99 · Accessibility: 88 · Best Practices: 100 · SEO: 82.

SiteSync – AI-Driven Multi-Site Construction Operations Platform [Live ↗](#)

- Architected a full-stack, multi-site construction operations platform (React, Node.js/Express, PostgreSQL) with real-time tracking of budgets, inventory, equipment, and workforce milestones.
- Built an autonomous AI operations agent using Groq (Llama 3.3 70B) and Gemini API with multi-step function/tool calling across SQL tables, automating anomaly detection, root-cause analysis, and cross-site inventory rebalancing.
- Implemented a Retrieval-Augmented Generation (RAG) conversational assistant with grounded citations linking responses to live purchase orders, inventory, and delivery records.
- Designed an extensible Model Context Protocol (MCP) server exposing live database tools for autonomous multi-agent orchestration.

Itihas – Interactive Historical Exploration Platform [Live ↗](#)

- Built a geospatial platform mapping 20+ ancient locations (scalable to more) with dynamic timeline routing via the OpenRouteService API.
- Modular React.js architecture with Framer Motion animations; sub-2s load time. Outstanding Lighthouse scores — Desktop: 97/96/100/82 · Mobile: 93/96/100/82 — with a perfect 100 in Best Practices.

EDUCATION

B.E. Computer Engineering – Thadomal Shahani Engineering College

2024 – 2028

CGPA: Sem 1: 9.37 | Sem 2: 9.25 | Sem 3: 9.59 | Sem 4: 9.83

12th CBSE (Computer Science)

2024

92.2% | JEE Mains: 93.17 percentile | MHT-CET: 98.713 percentile

ACHIEVEMENTS

- Won 2nd Place – CODEISSANCE 2026 (24-Hour Hackathon), Thadomal Shahani Engineering College.
- Won 3rd Place – MOSAIC National Level UI/UX Hackathon, RAIT D.Y. Patil College (50+ competing teams).
- JEE Mains 93.17 percentile | MHT-CET 98.713 percentile – top 2% of 800,000+ statewide candidates.
